

Tonto Basin Community Meeting Minutes

Tuesday March 12, 2019

- Report on Washington DC Trip. Delivered Power Point presentation to Senators regarding the need for a bridge at Tonto Basin. Bound book shown as example of the Power Point presented. All Senators agreed to write letters in support of the bridge over Tonto Creek.
- TestIT mobile app to sample broadband speeds across the country. Helps identify gaps in National broadband coverage. Handout
- Public Works March Update for Tonto Basin.
- Marvin Percha from the National Weather Service will be attending the April 2nd meeting. He will be offering a weather spotters class.
- Dollar Dump Day total reaches 4,892,200 pounds
- Update on Crappie Lane and surrounding subdivision roads. The area was developed without going through the County subdivision process. A resident notified us that the underground utilities are not buried to the required depth. In an attempt to resolve this, the issue has been turned over to the Corporation Commission.
- Crappie Lane, Malmut Drive, Buckshot, Dropshot and Lunker Lane are maintained under the County Country Dirt Road Policy. (Handout)
If residents wish to have the roads maintained at a higher level of service, there are two options.
 1. The first would be for the County to extinguish the dirt road easement and allow residents to maintain the roads.
 2. The second would be to create an improvement district and tax the residents to bring the roads up to County standards.

- ACE (All Children Eat) will maintain food supplies and pantries at 6 schools to assure that no child in our community goes without food. Monetary donations as well as food donations are needed. Handout
- Questions presented by residents.
 1. Will the area be getting more recycling containers?
 2. How was Crappie Lane brought into the County road system?
 3. Can Crappie Lane be removed from the County road system?

Steve Sullivan – ADOT

Discussed the financial hardships of trying to get funding for road repairs in rural areas. Let residents know that chip sealing is being done from the big hill by Roosevelt all the way through Tonto Basin.
